

Warning Label Database™

Protects Patients with Clear, Concise Electronic Labeling

PROVIDES PATIENT INSTRUCTIONS

Warning Label Database™ automates the auxiliary labeling process by providing clear, concise label text that can be printed onto adhesive labels for application on a prescription vial or container as part of the label generation process. In easy-to-understand language, these labels remind patients of essential instructions and warnings associated with the use of a given medication.

MEETS PHARMACISTS' NEEDS

- **Delivers** accurate, professionally prioritized information
- **Assists** in educating patients on:
 - Cautions and warnings
 - Proper drug administration and preparation
 - Important food and OTC medication interactions
 - Proper storage and disposal instructions

Warning Label Database™

INCLUDES:

- Up to five clinically appropriate warning labels per drug
- Text available in English, Spanish and Canadian-French languages
- An electronic cross-reference to widely distributed preprinted auxiliary label systems and font sources, including:
 - Pharmex®
 - Samuels
 - Intercon®
 - Architext®
 - Printed Solutions

BENEFITS

- *Saves time, money and storage space required to stock and use preprinted auxiliary labels*
- *Increases productivity within the dispensing workflow by simplifying the labeling process*
- *Reduces the risk of label omission or misuse, especially by pharmacy support personnel*
- *Eliminates communication barriers*
- *Increases efficiency by generating warning labels within the dispensing workflow*
