Centice Corporation Partners with Medi-Span
Centice and Medi-Span® to present new interface for PASS Rx® at APhA

MORRISVILLE, NC (April 2, 2009) — [Centice Corporation](#), the pioneer in drug verification and safety, announced today a partnership with Medi-Span, the most trusted name inside drug applications.

Increased script volume, fewer resources and manual subjective verification methodologies can unfortunately result in greater risk of medication errors in the pharmacy. PASS Rx is the first and only product that utilizes patented spectroscopy and machine vision sensor technologies to confirm the accuracy of a retail pharmacy's dispensed solid dose medications in a matter of seconds. Centice technologies have additional applicability beyond the verification of solid medications in the pharmacy, and the company has plans to develop future products for liquid medication verification and counterfeit drug detection.

In addition to sensor verification of the drug type and strength of oral solid medications, PASS Rx will now also incorporate Wolters Kluwer Health's Medi-Span Drug Image Database™ v2.0 and Drug Imprint Database™ v2.0 to provide additional valuable content on thousands of prescription and OTC medications, regardless of form and packaging. This allows pharmacy professionals to also visually verify a drug being dispensed against high-resolution images and descriptions of the prescribed medication.

The Medi-Span product line is comprised of drug and clinical information databases that can be embedded in a wide range of healthcare applications, including retail pharmacy, pharmacy benefit management, claims processing and electronic medical records.

Together with Medi-Span's data, PASS Rx provides a unique comprehensive system for enhanced verification of the medication before it is given to the patient, scientifically *and* visually.

"Centice is dedicated to offering solutions for improving patient safety as well as pharmacy quality," said Ray W. Swanson, President and CEO of Centice. "We are pleased that PASS Rx now offers our customers even more value for every prescription being verified in the pharmacy," he added.

"Wolters Kluwer Health has led the market on a number of drug information-related patient safety measures, including the use of Tall Man lettering, patient-specific dosing modules and actionable drug interaction information," said Arvind Subramanian, CEO, Wolters Kluwer Health Clinical Solutions. "Our partnership with Centice Corporation means that our joint customers now have access to the most powerful drug verification solutions on the market," he added.

Visit booth #1821 for a demonstration of PASS Rx at the 2009 American Pharmacists Association (APhA) Annual Meeting and Exposition in San Antonio, TX from April 4 – 6.

About Centice Corporation

Centice, founded in 2004 and headquartered in Morrisville, NC, is commercializing patented and patent-pending computational sensor and machine vision technology. The PASS Rx® pharmaceutical authentication sensor system improves the verification process for dispensed medications, thereby improving quality and optimizing workflow in the pharmacy. The company has received venture capital investments from The Aurora Funds, Inc., Novak Biddle Venture Partners, S-Group Direct Investments Ltd, Innovation Ventures LP, and other private investors. More information on Centice can be found at www.centice.com.
