

Medi-Span®

Medi-Span® Electronic Drug File™ (MED-File) v2

Delivers Comprehensive Drug Information

COMMUNICATES CLEARLY

Medi-Span® Electronic Drug File™ (MED-File) v2 provides a codified drug dictionary and drug vocabulary for prescription drugs and medication-based OTC products. MED-File v2 also includes several optional files including pricing, ingredients and numerous name-based concepts and alternative names at multiple levels of specificity to support the ever-changing world of drug information in healthcare.

MEETS PHARMACISTS' NEEDS

- Supports multiple functions critical to the pharmacy workflow:
 - Dispensing
 - Medication profiling
 - Clinical screening
 - Pricing
 - Inventory management

BENEFITS:

- Simplifies the process of generic product substitutions
- Facilitates formulary development and maintenance
- Enables clinicians to use drug terminology at the level of specificity appropriate for the task at hand
- Increases efficiency by providing access to automated, current pricing information

INCLUDES:

- Product names
- Dose form
- Route of administration
- Strength
- Strength unit of measure
- Pricing files (All Optional):
 - Average Wholesale Price (AWP)
 - Wholesale Acquisition Price (WAC)
 - Direct Price (DP)
 - Centers for Medicare & Medicaid Services, Federal Upper Limit (CMS FUL)
 - Average Average Wholesale Price (AAWP)
 - Generic Equivalent Average Price (GEAP)
- Ingredients (Optional)
- Name-based concepts and alternative names at multiple levels of specificity (Optional)
