

# Average WAC Pricing File

Provides Access to WAC-Based Pricing Concepts

The Average Wholesale Acquisition Cost (WAC) Pricing File provides customers with access to 2 additional pricing concepts, the Average WAC, or AWAC, and the Generic Equivalent WAC, or GEWAC. These concepts, created by algorithms that consider multiple criteria, bear similarity to Medi-Span's proprietary Average Average Wholesale Price (AAWP) and Generic Equivalent Average Price (GEAP) except calculations are based upon the WAC pricing data found in the Medi-Span® drug database.

## MEETS PAYERS' NEEDS

- **Provides** access to WAC-based pricing for products where a WAC price is not available
- **Updates** available daily
- **Provides** an average WAC price across available generic products
- **Provides** an average WAC price across available therapeutically equivalent products
- **Provides** information necessary to build a WAC-based Price Index for reimbursement rules or payment rules for multiple source pharmaceutical products

# Average WAC Pricing File

## **INCLUDES:**

- Generic Product Package Code (GPPC) Price Code (AWAC or GEWAC)
- Price Effective Date
- GPPC Unit Price
- Sample Size of 1 Indicator
- Current and up to 12 historical prices\*

\*Not all NDCs may have historical information. Historical information will grow following the product's launch.

## **BENEFITS**

- ***Provides a new option to customers to support their drug pricing analytics***
- ***Improves availability of WAC pricing when a WAC for a specific NDC is unavailable from the manufacturer***
